

REFRIGERATION CONTROLS

Take a load off your refrigeration system

Cut refrigeration costs and achieve maximum efficiency with Floating Head Pressure and Floating Suction Pressure Controls.

REFRIGERATION CONTROLS

Floating Head Pressure and Floating Suction Pressure Controls

Cut your refrigeration costs with Floating Pressure Controls.

EnergySmart Grocer Rebate:

- **Floating Head Pressure Controls**-\$60 per compressor HP
- **Floating Suction Pressure Controls**-\$10 per compressor HP

Requirements:

Rebates are applicable only to multiplex compressor refrigeration systems.

Benefits of refrigeration controls:

- Optimized refrigeration system performance
- Reduction in compressor power consumption and runtime
- Reduction in condenser fan motor use
- Takes advantage of cooler outside air temperature to lessen refrigeration work

Did you know?

Floating pressure controls is one of the largest single savings opportunity in a grocery store. Through the use of an EMS (Energy Management System), you can achieve sizable energy savings by leveraging the power of ambient air to reduce compressor workload and lower your refrigeration costs.
